

PROJECT SUMMARY – ISO 14001 Certification

CLIENT: Chicago area metal fabricating operation.

PROJECT: ISO 14001 Certification

PROJECT CHALLENGE:

Assist metal fabricator company in obtaining ISO 14001 certification in order to obtain new customer contracts.

SCOPE OF WORK:

The project scope involved evaluating and ranking environmental impacts of operations based on a site inspection, organizing an ISO 14001 committee including personnel from various departments and assisting the committee with developing an environmental management system (EMS) that satisfies ISO 14001 certification requirements.

Following a comprehensive inspection of all site activities and preparation of the environmental impacts inventory including significance rankings, Mostardi Platt generated ISO 14001 core procedures required under the standard.

Mostardi Platt then organized the company's ISO 14001 committee and led a series of meetings in order to develop the EMS. Key EMS components included objectives and goals, operating procedures, auditing, recordkeeping and employee training.

The project was completed on budget and the company passed phase I and II ISO 14001 registration audits for certification on schedule.
